

Stephen Bailey & Jamie Clark

The Fund

This is a feeder fund into the UK-domiciled Liontrust Macro Equity Income Fund which seeks to provide a rising level of income along with capital growth through investing predominantly in the UK, with some exposure to international companies, and using the Macro-Thematic process, which can lead to sector exposures being significantly different from those of the market and many of its sector's peers. Stephen Bailey and Jamie Clark believe that macro-thematic analysis – the identification and interpretation of major economic, political and social developments affecting the UK and the rest of the world – offers scope to add long-term investment value. For full investment objective and policy details please refer to the Prospectus.

Key risks: Past performance is not a guide to future performance. Discrete data is not available for five full 12 month periods due to the launch date of the portfolio. Investment in the Fund carries the risk of potential total loss of capital. The Fund's expenses are charged to capital. This has the effect of increasing the distribution and constraining the Fund's capital performance. The performance of the Liontrust GF Macro Equity Income Fund may differ from the performance of the Liontrust Macro Equity Income Fund and will be lower than its corresponding Master Fund due to additional fees and expenses. Investment decisions should not be based on short-term performance.

*Historic yield: reflects distributions declared over the past 12 months as a percentage of the mid-market unit price. It does not include any preliminary charge and investors may be subject to tax on their distributions. **The fraction of a fund (or master fund) invested differently to its benchmark. A 100% active share is a fund (or master fund) with no holdings in the benchmark, a 0% active share is a fund (or master fund) identical to the benchmark.

*The Ongoing Charges Figure (OCF) covers all aspects of operating a fund during the course of its financial year. These include the annual charge for managing the fund, administration and independent oversight functions, such as trustee, depository, custody, legal and audit fees. The OCF also **includes** the Fixed Administration fee of the Master Fund. The OCF **excludes** portfolio transaction costs except for an entry/exit charge paid by the Fund when buying or selling units in another fund. This will have an impact on the realisable value of the investment, particularly in the short term. **These are the annual costs of running and managing the Fund.
