

The Fund

The Fund seeks to provide investors with a high level of income with capital values keeping pace with inflation over a medium to long-term investment horizon through using the Cashflow Solution process. The Fund only buys high-yielding stocks with unusually strong cash flows where investors have low profit expectations. Strong company cash flows (after investment spending) are a good indicator of strong growth in future reported profits. For full investment objective and policy details please refer to the Prospectus.

Key risks: Past performance is not a guide to future performance. Investment in the Fund carries the risk of potential total loss of capital. Investment in the Fund involves a foreign currency and may be subject to fluctuations in value due to movements in exchange rates. The Fund's expenses are charged to capital. This has the effect of increasing the distribution and constraining the Fund's capital performance. Investment decisions should not be based on short-term performance.

^{^^}The amount of income generated for distribution after deducting all expenses.

Charges

Initial charge	0.00%
Ongoing Charges Figure*	0.93%
Included within the OCF is the Annual Management Charge**	0.75%

*The Ongoing Charges Figure (OCF) covers all aspects of operating a fund during the course of its financial year. These include the annual charge for managing the fund, administration and independent oversight functions, such as trustee, depository, custody, legal and audit fees. The OCF **excludes** portfolio transaction costs except for an entry/exit charge paid by the Fund when buying or selling units in another fund. This will have an impact on the realisable value of the investment, particularly in the short term. **These are the annual costs of running and managing the Fund.
