Key risks: Past performance is not a guide to future performance. Investment in the Fund carries the risk of potential total loss of capital. Investment in the Fund involves a foreign currency and may be subject to fluctuations in value due to movements in exchange rates. The Fund's expenses are charged to capital. This has the effect of increasing the distribution and constraining the Fund's capital performance. Investment decisions should not be based on short-term performance.

^{^^}The amount of income generated for distribution after deducting all expenses.
