

Aitken Ross & Stuart Steven & Kenny Watson

The Fund

The Fund aims to provide a higher long-term return than UK Government Bonds, with most of the returns likely to be to come from income. The Fund typically invests at least 70% of the portfolio in sterling denominated fixed income securities issued by corporates, governments and supranational institutions. Up to 30% of the Fund can be invested in non-sterling denominated fixed income securities, which are typically hedged back into sterling. The Fund invests only in the bonds of companies that meet the team's rules for environmental and social responsibility.
