

GF ABSOLUTE RETURN BOND

Retail Acc EUR Class (A1) Hedged - Fund Factsheet - Covering the month of March 2024

Phil Milburn & Donald Phillips

The Fund

The Fund aims to generate a positive absolute return through a combination of capital growth and income over a rolling 12 month period, irrespective of market conditions. The Fund aims to achieve its investment objective through investment in corporate and government fixed income markets worldwide, including developed and emerging markets. In achieving its objective, the Fund also aims to minimise volatility and reduce the possibility of a significant drawdown (i.e. a period where the Fund is worth less than the initial investment at the start of a 12 month period). For full investment objective and policy details please refer to the Prospectus.

Ongoing Charges Figure*	1.07%
Included within the OCF is the Annual Management Charge**	1.00%

*The Ongoing Charges Figure (OCF) covers all aspects of operating a fund during the course of its financial year. These include the annual charge for managing the fund, administration and independent oversight functions, such as trustee, depository, custody, legal and audit fees and the ongoing costs of underlying investments including open and closed ended collective investment schemes. The OCF **excludes** portfolio transaction costs except for an entry/exit charge paid by the Fund when buying or selling units in another fund. This will have an impact on the realisable value of the investment, particularly in the short term.

**These are the annual costs of running and managing the Fund.

GF ABSOLUTE RETURN BOND

Important information

Key Risks: We recommend this fund is held long term (minimum period of 5 years). We recommend that you hold this fund as part of a diversified portfolio of investments. The fund manager considers environmental, social and governance ("ESG") characteristics of issuers when selecting investments for the Fund. Overseas investments may carry a higher currency risk. They are valued by reference to their local currency which may move up or down when compared to the currency of the Fund. Bonds are affected by changes in interest rates and their value and the income they generate can rise or fall as a result; The creditworthiness of a bond issuer may also affect that bond's value. Bonds that produce a higher level of income usually also carry greater risk as such bond issuers may have difficulty in paying their debts. The value of a bond would be significantly affected if the issuer either refused to pay or was unable to pay. The Fund can invest in derivatives. Derivatives are used to protect against currency, credit or interest rate moves or for investment purposes. There is a risk that losses could be made on derivative positions or that the counterparties could fail to complete on transactions. The Fund uses derivative instruments that may result in higher cash levels. Cash may be deposited with several credit counterparties (e.g. international banks) or in short dated bonds. A credit risk arises should one or more of these counterparties be unable to return the deposited cash. The Fund invests in emerging markets which carries a higher risk than investment in more developed countries. This may result in higher volatility and larger drops in the value of the fund over the short term. The Fund may encounter liquidity constraints from time to time. Participation rates on advertised volumes could fall reflecting the less liquid nature of the current market conditions. Counterparty Risk: any derivative contract, including FX hedging, may be at risk if the counterparty fails. There is no guarantee that an absolute return will be generated over a rolling 12 month period or any other time period. The issue of units/shares in Liontrust Funds may be subject to an initial charge, which will have an impact on the realisable value of the investment, particularly in the short term. Investments should always be considered as long term.
