As the share class has been in existence for less than one discrete year as at the previous quarter end, there is insufficient data to provide an indication of past performance.

Key risks: The value of an investment and the income generated from it can fall as well as rise and is not guaranteed. You may get back less than you originally invested. Investment in the Fund involves a foreign currency and may be subject to fluctuations in value due to movements in exchange rates. The Fund holds a concentrated portfolio which could mean that it will be volatile when compared to its benchmark. Investment decisions should not be based on short-term performance. Discrete performance data is not available for five full 12 month periods due to the launch date of the portfolio.

^{*}The fraction of a fund invested differently to its benchmark. A 100% active share is a fund with no holdings in the benchmark, a 0% active share is a fund identical to the benchmark.
