Imran Sattar

26 years' investment experience

Co-managed the UK Equity Fund since June 2019

The Fund

- The UK Focus Fund is our concentrated UK equity fund which has the flexibility to invest up to 20% of net asset value in shares listed outside the UK.
- The UK Focus Fund is a UK domiciled OEIC.
- It is managed by Imran Sattar.

Objective

- To deliver a total return (the combination of income and capital growth) in excess of the FTSE All-Share Total Return Index, after all costs and charges have been taken, over any five year period. There is no guarantee that the objective will be met over any time period and you may get back less than you invest.

Key risks: Past performance does not predict future returns. You may get back less than you originally invested. We recommend this fund is held long term (minimum period of 5 years). We recommend that you hold this fund as part of a diversified portfolio of investments. Overseas investments may carry a higher currency risk. They are valued by reference to their local currency which may move up or down when compared to the currency of the Fund. This Fund may have a concentrated portfolio, i.e. hold a limited number of investments. If one of these investments falls in value this can have a greater impact on the Fund's value than if it held a larger number of investments. The Fund may invest in emerging markets which carries a higher risk than investment in more developed countries. This may result in higher volatility and larger drops in the value of the fund over the short term. The Fund may encounter liquidity constraints from time to time. The spread between the price you buy and sell shares will reflect the less liquid nature of the underlying holdings. Outside of normal conditions, the Fund may hold higher levels of cash which may be deposited with several credit counterparties (e.g. international banks). A credit risk arises should one or more of these counterparties be unable to return the deposited cash. Counterparty Risk: any derivative contract, including FX hedging, may be at risk if the counterparty fails.

* The fraction of a fund invested differently to its benchmark. A 100% active share is a fund with no holdings in the benchmark, a 0% active share is a fund identical to the benchmark.

** Historic Yield: This calculates the income distributions made by the fund over the past 12 months as a percentage of fund value or unit price.

†† The Ongoing Charges Figure (OCF) covers all aspects of operating a fund during the course of its financial year. These include the annual charge for managing the fund, administration and independent oversight functions, such as trustee, depository, custody, legal and audit fees and the ongoing costs of underlying investments including open and closed ended collective investment schemes. The OCF excludes portfolio transaction costs except for an entry/exit charge paid by the Fund when buying or selling units in another fund. This will have an impact on the realisable value of the investment, particularly in the short term. These are the annual costs of running and managing the Fund.
