

LIONTRUST SUSTAINABLE FUTURE MANAGED FUND

Fund sustainability and impact report: Q2, 2020

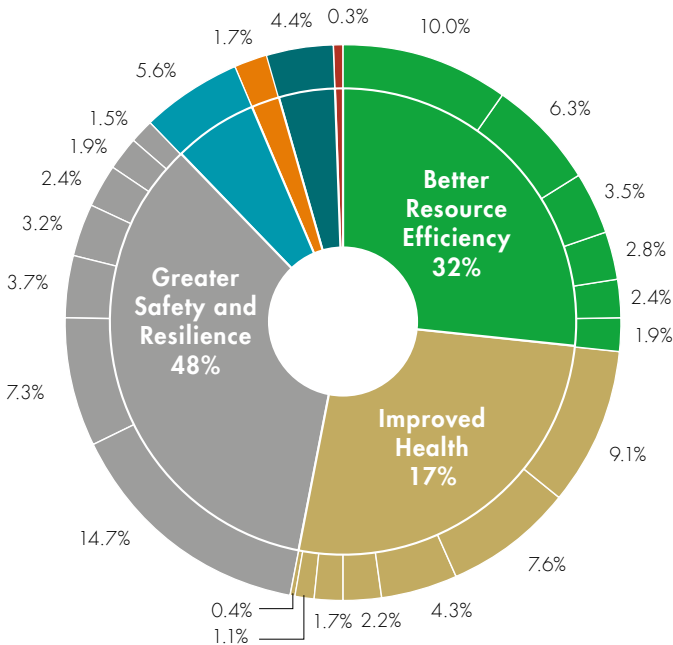

Contents

Exposure to positive sustainability investment trends	3–4
Alignment with UN Sustainable Development Goals	5
Assessment of how sustainable companies are: Sustainability Matrix Rating	6
Climate change: portfolio data on carbon, solutions and fossil fuels	7
Weight of holdings owning fossil fuels	8
Fund holdings	9–14

Exposure to positive sustainability investment trends

We look to invest in companies which are making a positive contribution to our economy by making our economy either cleaner, healthier or safer. Exposure to 20 of our 20 investment themes investment themes is shown below.

Exposure to sustainable themes

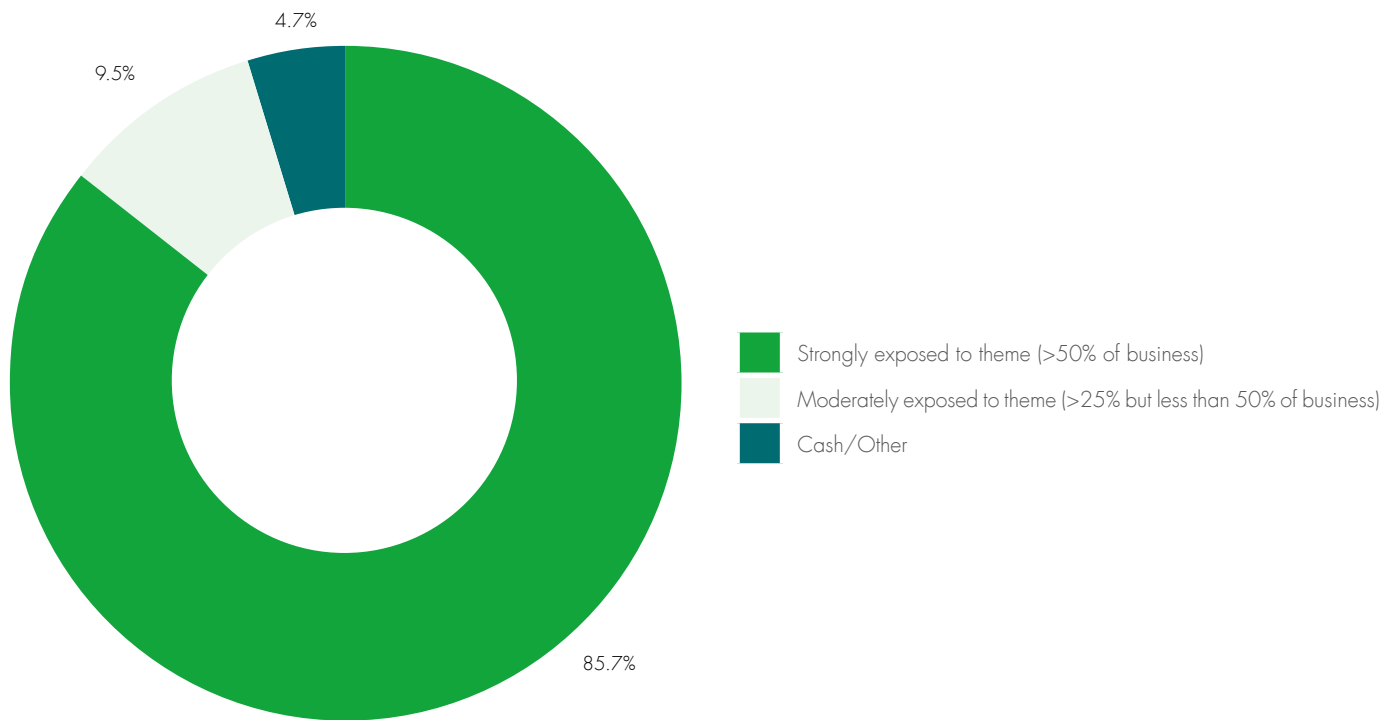

Source: Liontrust / Factset, 30 June 2020

Exposure to positive sustainability investment trends

Sustainable investment themes: how much of business is exposed

This analysis shows what proportion of the company is exposed to the sustainable investment themes: 85.7% of the fund is invested in companies that are strongly exposed to the positive investment theme with more than 50% of the business exposed to the theme;

9.5% of the fund is invested in companies that are moderately exposed to the positive investment theme with between 25% and 50% of the business exposed to the theme.

Source: Liontrust / Factset, 30 June 2020

Alignment with UN Sustainable Development Goals

This analysis shows how the Sustainable investment themes are linked to the United Nations Sustainable Development Goals (SDGs).

All of the Sustainable investment themes are linked to SDGs and the underlying Key Performance Indicator they relate to have been identified in the SDG text. A more detailed discussion on impact and how the Sustainable investment themes are aligned with the

SDG's is available in the SF Annual Review 2019 on pages 20-28: www.liontrust.co.uk/sustainable

The fund has most exposure to SDG 8: Decent work and economic growth (27%); SDG 3: Good health and well-being (19%); SDG 9: Industry, innovation and infrastructure (18%); and SDG 7: Affordable and clean energy (13%).

The fund is exposed to 8 of the 17 UN SDGs.

Sustainable investment themes mapped to UN Sustainable Development Goals (% of fund exposure)

Assessment of how sustainable companies are: Sustainability Matrix Rating

We assess every company using our proprietary Sustainability Matrix Rating which measures how sustainable the products and services are as well as how well they manage the material environmental, social and governance (ESG) matters related to their business.

The weighted average Sustainability Matrix rating for the fund is B2 (marked in red in the figure below). This shows the fund is invested in companies whose products and services are more sustainable and whose management of ESG aspects of their business is better than the market it invests in. There are no companies in the fund which are rated in the ineligible grey area of the Sustainability matrix.

Climate change: portfolio data on carbon, solutions and fossil fuels

Carbon emissions of fund as compared to the conventional benchmark

This analysis shows the investments in the fund emit 75% less carbon emissions (tCO₂e) than the market it invests in.

Source: MSCI Carbon analytics as at 30 June 2020.

Companies offering clean technology solutions

This analysis shows that the fund holds 26.2% of companies which MSCI have determined are providing clean technology solutions helping reduce emissions. This is 3.4% less than the market this fund invests in.

Source: MSCI Carbon Analytics as at 30 June 2020.

Weight of holdings owning fossil fuels

Weight of companies owning fossil fuel reserves

This analysis shows the fund has very low exposure to companies that own fossil fuel reserves: 0.4% exposure to any fossil fuel reserves; 0% exposure to thermal coal reserves; this 0.40% exposure is to natural gas reserves; and 0% exposure to oil reserves.

There is one company in the fund, SSE PLC, that owns any fossil fuels but this is a very small part of their business (less than 5% of their sales) and their investments are focused on delivering ultra-low carbon electricity from renewables. Exposure to sales from fossil fuels in the fund is (<5% multiplied by 0.4%) which is insignificantly small.

Key risks

Past performance is not a guide to future performance. Do remember that the value of an investment and the income generated from them can fall as well as rise and is not guaranteed, therefore, you may not get back the amount originally invested and potentially risk total loss of capital.
