

LIONTRUST SUSTAINABLE FUTURE UK GROWTH FUND

Fund sustainability and impact report: Q2, 2021

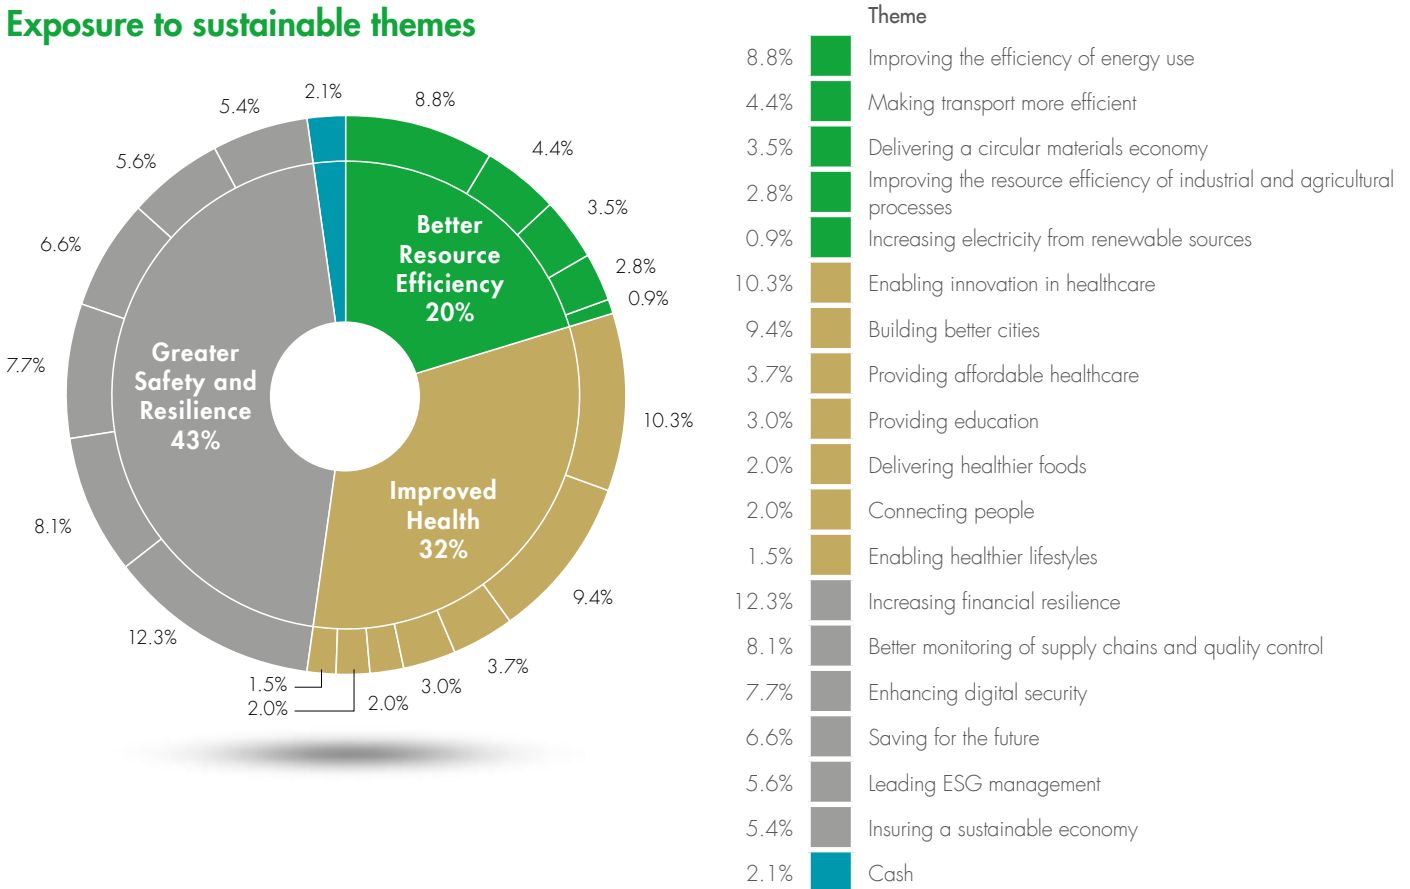

Contents

Exposure to positive sustainability investment trends	3–4
Alignment with UN Sustainable Development Goals	5
Assessment of how sustainable companies are: Sustainability Matrix Rating	6
Climate change: portfolio data on carbon, solutions and fossil fuels	7
Weight of holdings owning fossil fuels	8
Fund holdings	9–11

Exposure to positive sustainability investment trends

We look to invest in companies having a positive impact on our economy by making it cleaner, healthier or safer. Exposure to 18 of our 21 Sustainable investment themes is shown below.

Exposure to sustainable themes

Exposure to positive sustainability investment trends

Sustainable investment themes: how much of business is exposed

This analysis shows what proportion of companies held in the fund is exposed to the Sustainable investment themes: 85.0% of the fund is invested in companies that are strongly exposed to our themes (which

means more than 50% of the business's revenues); a further 12.9% of the fund is invested in companies that are moderately exposed to our themes, which means between 25% and 50% of revenues.

Source: Liontrust / Factset, 30 June 2021

Alignment with UN Sustainable Development Goals

This analysis shows how the Sustainable investment themes are linked to the United Nations' Sustainable Development Goals (SDGs).

All of the Sustainable investment themes are linked to SDGs and the underlying Key Performance Indicator they relate to have been identified in the SDG text. A more detailed discussion on impact and how the Sustainable themes are aligned with the SDGs is

available in the SF Annual Review 2020 on pages 27-33: www.liontrust.co.uk/sustainable

The fund has most exposure to SDG 8: Decent work & economic growth (24.3%); SDG 3: Good health & wellbeing (17.5%); SDG 11: Sustainable cities and communities (13.8%) and SDG 9: Industry, innovation and infrastructure (12.5%).

The fund is exposed to seven of the 17 UN SDGs.

Assessment of how sustainable companies are: Sustainability Matrix Rating

We assess every company using our proprietary Sustainability Matrix Rating, which measures how sustainable the products and services are as well as how well they manage the material environmental, social and governance (ESG) matters related to their business.

The weighted average Sustainability Matrix rating for the fund is B2 (marked in red in the figure below). This shows the fund is invested in companies whose products and services are more sustainable and whose management of ESG aspects of their business is better than the market it invests in. There are no companies in the fund which are rated in the ineligible grey area of the Sustainability matrix.

Climate change: portfolio data on carbon, solutions and fossil fuels

Carbon emissions of fund compared to conventional benchmark

This analysis shows the investments in the fund emit 74.2% less carbon (tCO₂e) than the market it invests in. This independent analysis includes direct emissions forming scope 1 and scope 2 emissions only*.

Source: MSCI Carbon analytics as at 30 June 2021. The MSCI UK Index is one of two comparator benchmarks for this fund. Carbon emissions data available for 80.1% of the fund and 100% of the benchmark. *Scope 1 emissions are direct greenhouse (GHG) emissions that occur from sources controlled or owned by an organisation (associated with fuel combustion in boilers, furnaces, vehicles and so on). Scope 2 emissions are indirect GHG emissions associated with the purchase of electricity, steam, heat, or cooling. Scope 3 (all indirect emissions, not included in scope 2, that occur in the value chain of the reporting company) is important but not currently available in a consistent data set with enough coverage to be included in this independent analysis.

Companies offering clean technology solutions

This analysis shows that the fund holds 18.8% of companies that MSCI has determined are providing clean technology solutions. Although their methodology is different to ours, it does broadly correspond to 23% of the fund being invested in companies with significantly more than 25% of sales related to better resource efficiency, which reduces emissions.

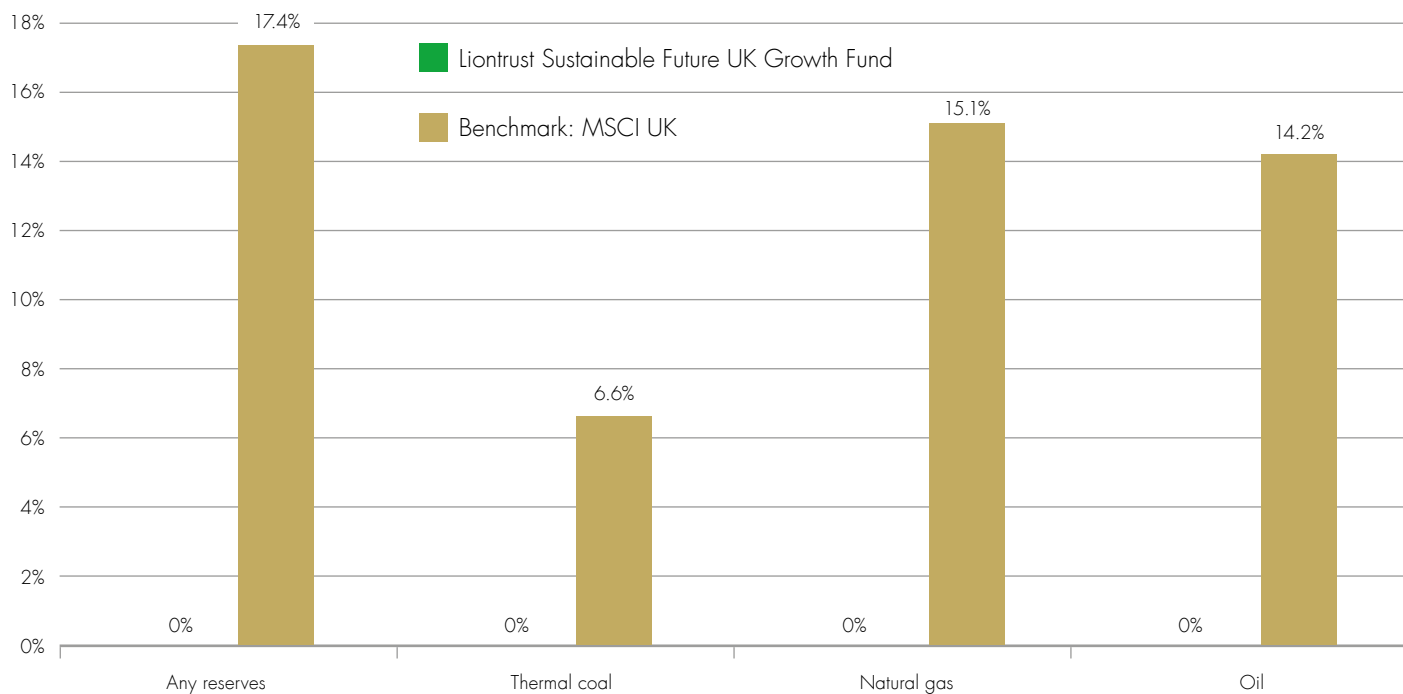

Source: MSCI Carbon Analytics as at 30 June 2021.

Weight of holdings owning fossil fuels

Weight of companies owning fossil fuel reserves

Liontrust Sustainable Future UK Growth Fund = zero exposure

This analysis shows the fund holds no companies which have fossil fuel reserves: 0% exposure to any fossil fuel reserves; 0% exposure to thermal coal reserves; 0% exposure to natural gas reserves; and 0% exposure to oil reserves.

Source: MSCI Carbon Analytics as at 30 June 2021. The MSCI UK Index is one of two comparator benchmarks for this fund. Carbon emissions data available for 80.1% of the fund and 100% of the benchmark

All Fund holdings

Alphabetical list showing all holdings in the fund along with their sector, our Sustainability Matrix Rating and Sustainable investment theme. The fund is invested in 50 companies.

Company name	Sector	Sustainability Matrix	Sustainable investment theme

Key risks

Past performance is not a guide to future performance. Do remember that the value of an investment and the income generated from them can fall as well as rise and is not guaranteed, therefore, you may not get back the amount originally invested and potentially risk total loss of capital.
