

KEY INVESTOR INFORMATION

This document provides you with key investor information about the fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in the fund. You are advised to read it so you can make an informed decision about whether to invest.

LIONTRUST GF INTERNATIONAL EQUITY FUND (GBP)

Class F GBP Acc

ISIN IE00BKY59Z89

The Liontrust GF International Equity Fund (the Fund) is a sub-fund of Majedie Asset Management (International) Investment Fund Company PLC (the Company), an Irish domiciled Open Ended Investment Company.

The Fund is managed by Carne Global Fund Managers (Ireland) Limited (the "Manager").

OBJECTIVES AND INVESTMENT POLICY

The Fund aims to produce a total return in excess of the MSCI All Country World Index (ex U.S.) ("Index") over any period of five years after all costs and charges have been deducted. It is intended that the investment objective of the Fund will be achieved primarily through investment in a diversified portfolio of equity securities of companies which are listed or traded on one or more markets listed in Appendix I to the Prospectus. Such investment may include constituents of the Index. However, the Index is used as a target benchmark and the Fund is not constrained in how far its holdings can deviate from the weightings of the Index. Diversification will be achieved through investments in securities of several countries or regions and sectors.

The Investment Manager will construct the Fund's portfolio taking into consideration macroeconomic factors (such as interest rates, GDP, monetary and fiscal trends), the outlook for different economic sectors and market capitalisations, and stock-specific factors (such as valuation, market position, investment potential, management quality and financial strength). There is no policy to restrict investment to any particular economic sector or industry.

The Investment Manager takes a long-term high conviction view of investment opportunities and will target a relatively concentrated portfolio of companies that meet the criteria set out above, with the Fund likely to

hold securities in the order of 35-55 companies at any one time (though this is not a hard cap or a floor). The Fund will be actively managed. The Fund is managed in reference to a benchmark in that it has a target to outperform the MSCI All World (ex-U.S.) Index but is not constrained by the index in any way.

The Fund may invest up to 10% of its Net Asset Value in U.S. equities and up to 40% of its Net Asset Value in emerging market securities, with the balance in other international equities, cash or money market instruments (treasury bills, commercial paper, certificates of deposit or money market funds).

The Fund may invest up to 10% of its Net Asset Value in other collective investment schemes. Other collective investment schemes could include money market funds invested in for cash management purposes.

The Fund is not expected to generate significant amounts of income. There can be no guarantee that the investment objective of the Fund will be achieved.

The F Acc (Sterling) shares in this Fund are accumulation shares. This means income from the Fund's investments will be included in the value of your shares rather than being paid out via a dividend.

This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

RISK & REWARD PROFILE

The Risk and Reward indicator table demonstrates where the Fund ranks in terms of its potential risk and return. The higher the rank, the greater the potential reward but the greater the risk of losing money. The risk category shown is not guaranteed and may shift over time. The lowest category shown is not guaranteed and may shift over time. The lowest category does not mean risk free.

The Fund's Risk and Reward Indicator is based on Fund volatility since inception, and prior to that, the MSCI All Country World Index (ex U.S.). The indicator uses a standard calculation method that is used by all EU companies who offer such funds to allow you to compare funds.

Market Risk: the investments of the Fund are subject to normal market fluctuations and the risk inherent in investment in equity securities and similar instruments and there can be no assurances that appreciation will occur.

Equity Risk: the value of equities may fall as well as rise and as a class of investment, equities are typically more volatile than other common investment types such as bonds or cash.

Currency Risk: the Fund invests in international securities which are denominated in foreign currencies whose fluctuations may increase the fund's volatility and losses. Some share classes may be designated in a currency other than the base currency (USD). In such circumstances, adverse exchange rate fluctuations between the base currency and the currency of the share class may result in a decrease in return and/or a loss of capital.

Emerging Market Risk: the Fund invests in emerging markets which are subject to certain political, legal, regulatory, accounting, custody, settlement and counterparty, liquidity, currency and fluctuation in value risks more than those that only invest in developed markets.

Nature of Investments & Concentration Risk: the Fund intends to make investments which the Investment Manager perceives as having the potential for substantial return but which may also involve substantial risks. There can be no assurance that the Fund will be able to realise its investments in a timely manner. Since the Fund may only make a limited number of investments and since such investment may involve a high degree of risk, poor performance by such investments could severely affect the total return to investors.

While the Investment Manager will regularly monitor the concentration of the Fund's exposure to related risk, concentration in any one industry, region or country or with respect to any given counterparty may arise from time to time. To the extent there is a downturn where the Fund has concentration, this could reduce the return the Fund receives on its investments.

For more information on potential risks please request the Prospectus using the contact details overleaf.

CHARGES

The charges you pay are used to pay the costs of running the Fund.

ONE OFF CHARGES

Entry charge	0.00 %
Exit charge	0.00 %

CHARGES TAKEN FROM THE FUND OVER A YEAR

Ongoing charges	0.25 %
-----------------	--------

CHARGES TAKEN UNDER CERTAIN CONDITIONS
