

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Liontrust GF UK Growth Fund is a sub-fund of Liontrust Global Funds plc. The Management Company is Bridge Fund Management Limited. This document is based upon the C1 GBP Accumulating share class (ISIN: IE00BP4KB181), which is the representative class for all share classes listed in this document.

Objective

- To provide long-term capital growth by investing predominantly in UK large and mid-cap stocks using the Economic Advantage investment process.

Policy

- The Fund is considered to be actively managed in reference to the benchmark(s) in the performance table by virtue of the fact that it uses the benchmark(s) for performance comparison purposes. The benchmark(s) are not used to define the portfolio composition of the Fund and the Fund may be wholly invested in securities which are not constituents of the benchmark.
- The Fund invests at least 80% in securities of companies traded on the UK and Irish stock exchanges.
- The Fund invests predominantly in UK large and mid-cap stocks.
- Income from the Fund's investments may either be paid to you or reinvested in the Fund.

Recommendation

- This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

How to buy

- You may buy or sell shares on a daily basis (but not weekends or Bank Holidays). Orders must be received by 11.59am (Irish time) for execution at 12.00 midday valuation point. Further details can be found at www.liontrust.co.uk.

Investment process

- A fundamental principle of competitive markets is that profits regress to the mean. The fund managers believe the secret to successful investing is to identify those few companies that have a durable Economic Advantage which allows them to defy this principle and sustain a higher than average level of profitability for longer than expected. This surprises the market and can lead to strong share price appreciation.
- Economic Advantage is the collection of distinctive characteristics of a company that competitors struggle to reproduce even if those competitors have understood the benefits arising from those characteristics.
- In the fund managers' experience, the hardest characteristics for competitors to replicate are "three classes of intangible assets": intellectual property, strong distribution channels and significant recurring business.
- The fund managers evaluate companies in the UK stock market for their possession of durable Economic Advantage. Companies must possess at least one of the main advantages: intellectual property, strong distribution or recurring business (at least 70% of annual turnover).
- The fund managers measure the universe of Economic Advantage companies for the market's appreciation of their potential earnings growth. Under-appreciated companies have the strongest potential for share price growth.
- Every smaller company held in the Economic Advantage funds has at least 3% of its equity held by senior management and main board directors. Companies are also assessed for employee ownership below the senior management and board and changes in equity ownership are monitored.

Risk and reward profile

- This Synthetic Risk and Reward Indicator (SRRI) is based on historical data and may not be relied upon to gauge the future risk profile of the Fund.
- The SRRI shown is not guaranteed to remain the same and may shift over time.
- The lowest category (1) does not mean 'risk free'.
- The Fund's risk and reward category has been calculated using the methodology set by the European Commission. It is based upon the rate by which the Fund or a representative fund or index's value has moved up and down in the past.
- The Fund invests in UK & Irish equities. The Fund may also invest in other eligible asset classes as detailed within the prospectus.
- The Fund is categorised 5 primarily for its exposure to UK equities.
- The SRRI may not fully take into account the following risks:
 - that a company may fail thus reducing its value within the Fund;
 - overseas investments may carry a higher currency risk. They are valued by reference to their local currency which may move up or down when compared to the currency of the Fund.
- The Fund may, under certain circumstances, invest in derivatives, but it is not intended that their use will materially affect volatility. Derivatives are used to protect against currencies, credit and interest rate moves or for investment purposes. There is a risk that losses could be made on derivative positions or that the counterparties could fail to complete on transactions. The use of derivatives may create leverage or gearing resulting in potentially greater volatility or fluctuations in the net asset value of the Fund. A relatively small movement in the value of a derivative's underlying investment may have a larger impact, positive or negative, on the value of a fund than if the underlying investment was held instead. The use of derivative contracts may help us to control Fund volatility in both up and down markets by hedging against the general market.
- Outside of normal conditions, the Fund may hold higher levels of cash which may be deposited with several credit counterparties (e.g. international banks). A credit risk arises should one or more of these counterparties be unable to return the deposited cash.
- The Fund is expected to invest in companies predominantly in a single country which maybe subject to greater political, social and economic risks which could result in greater volatility than investments in more broadly diversified funds.
- The Fund may encounter liquidity constraints from time to time. The spread between the price you buy and sell shares will reflect the less liquid nature of the underlying holdings.
- The Fund may invest in companies listed on the Alternative Investment Market (AIM) which is primarily for emerging or smaller companies. The rules are less demanding than those of the official List of the London Stock Exchange and therefore companies listed on AIM may carry a greater risk than a company with a full listing.
- The fund's investment objective is to target capital growth for investors. Growth stocks tend to pay out lower levels of dividend resulting in lower income yields and may produce more volatile returns than the market as a whole.
- The Fund may have both Hedged and Unhedged share classes available. The Hedged share classes use forward foreign exchange contracts to protect returns in the base currency of the Fund.
- Counterparty Risk: any derivative contract, including FX hedging, may be at risk if the counterparty fails.
- ESG Risk: there may be limitations to the availability, completeness or accuracy of ESG information from third-party providers, or inconsistencies in the consideration of ESG factors

across different third party data providers, given the evolving nature of ESG.

- For full details of the Fund's risks, please see the prospectus which may be obtained from Liontrust (address overleaf) or online at www.liontrust.co.uk.

Charges for this fund

- The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	5.00%
Exit charge	None

- This is the maximum that might be taken out of your money before it is invested.

Charges taken from the Fund over the year	
Ongoing charges	Classes C3 GBP Acc, C6 GBP Inc: 0.92%
	Class C1 GBP Acc: 1.67%

Charges taken from the Fund under certain specific circumstances	
Performance fee	None

- The entry and exit charges shown are maximum figures. In some cases you might pay less – you can find this out from your financial adviser or fund platform if you are not using a financial adviser.

- The ongoing charges figure is based on expenses as at 31 December 2023. This figure may vary from year to year. It excludes:

- portfolio transaction costs, except in the case of an entry/exit charge paid by the UCITS when buying or selling units/shares in another collective investment undertaking.

- For more information about charges and what is included in each charge, please see the Fund's prospectus, which is available electronically at www.liontrust.co.uk or visit the costs and charges page on our website at www.liontrust.co.uk/cost-and-charges.

Past performance

- Past performance does not predict future returns. It has been calculated on the basis that any distributable income of the Fund has been reinvested. The past performance shown in the chart takes into account all charges except entry and exit charges.

- The Fund launch date is 03 September 2014.
- The C1 GBP Acc share class launch date is 10 August 2020.
- The base currency of the Fund is pounds sterling.
