

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Liontrust GF UK Equity Fund is a sub-fund of Liontrust Global Fundamental plc. The Management Company is Bridge Fund Management Limited. This document is based upon the A GBP Accumulating share class (ISIN: IE00BW0DL879), which is the representative class for all share classes listed in this document.

Objective

- The Fund aims to produce a total return in excess of the FTSE All-Share Index over the long term through investment in a diversified portfolio of predominantly UK equities.

Policy

- The Fund is actively managed. The Fund is managed in reference to a benchmark in that it has a target to outperform the FTSE All-Share Index but is not constrained by the Index in any way.
- There is no policy to restrict investment to any particular economic sector or industry.
- The Fund intends to invest in the equity securities of companies which are listed or traded on one or more Markets listed in Appendix I to the Prospectus.
- At least 80% of the Fund will be invested in UK equities, with the balance in international equities (which for the avoidance of doubt could include emerging markets equities), cash or near cash.
- The Fund may invest up to 10% of its Net Asset Value in other collective investment schemes such as money market funds invested in for cash management purposes.
- There can be no guarantee that the investment objective of the Fund will be achieved.
- The Class A Acc shares in this Fund are Accumulation shares. This means income from the Fund's investments will be included in the value of your shares rather than being paid out via a dividend.

Recommendation

- This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

How to buy

- You may buy or sell shares on a daily basis (but not weekends or Bank Holidays). Orders must be received by 12.00pm (Irish time) for execution at 12.00 valuation point. Further details can be found at www.liontrust.co.uk.

Investment process

- The fund manager applies a flexible investment process, which avoids inbuilt style biases and enables the team to pursue investment alpha regardless of economic and market conditions.
- The fund manager focuses on shares that, in their view, offer the best risk/reward profiles, while ensuring the portfolio is well balanced and risk is carefully targeted.
- The fund manager is first and foremost a stock picker although macro-economic research is also woven into the team's bottom-up research.
- The fund manager considers environmental, social and governance (ESG) as a key risk consideration as part of their investment process and engage with companies to ensure best practice.

Risk and reward profile

- This Synthetic Risk and Reward Indicator (SRRI) is based on historical data and may not be relied upon to gauge the future risk profile of the Fund.
- The SRRI shown is not guaranteed to remain the same and may shift over time.
- The lowest category (1) does not mean 'risk free'.
- The Fund's risk and reward category has been calculated using the methodology set by the European Commission. It is based upon the rate by which the Fund or a representative fund or index's value has moved up and down in the past.
- The Fund invests in UK equities. The Fund may also invest in other eligible asset classes as detailed within the prospectus.
- The Fund is categorised 6 primarily for its exposure to UK equities.
- The SRRI may not fully take into account the following risks:
 - that a company may fail thus reducing its value within the Fund;
 - overseas investments may carry a higher currency risk. They are valued by reference to their local currency which may move up or down when compared to the currency of the Fund.
- The Fund may, under certain circumstances, invest in derivatives, but it is not intended that their use will materially affect volatility. Derivatives are used to protect against currencies, credit and interest rate moves or for investment purposes. There is a risk that losses could be made on derivative positions or that the counterparties could fail to complete on transactions. The use of derivatives may create leverage or gearing resulting in potentially greater volatility or fluctuations in the net asset value of the Fund. A relatively small movement in the value of a derivative's underlying investment may have a larger impact, positive or negative, on the value of a fund than if the underlying investment was held instead. The use of derivative contracts may help us to control Fund volatility in both up and down markets by hedging against the general market.
- Outside of normal conditions, the Fund may hold higher levels of cash which may be deposited with several credit counterparties (e.g. international banks). A credit risk arises should one or more of these counterparties be unable to return the deposited cash.
- The Fund is expected to invest in companies predominantly in a single country which maybe subject to greater political, social and economic risks which could result in greater volatility than investments in more broadly diversified funds.
- The Fund may invest in emerging markets which carries a higher risk than investment in more developed countries. This may result in higher volatility and larger drops in the value of the fund over the short term.
- The Fund may encounter liquidity constraints from time to time. The spread between the price you buy and sell shares will reflect the less liquid nature of the underlying holdings.
- The fund's investment objective is to target capital growth for investors. Growth stocks tend to pay out lower levels of dividend resulting in lower income yields and may produce more volatile returns than the market as a whole.
- The Fund may have both Hedged and Unhedged share classes available. The Hedged share classes use forward foreign exchange contracts to protect returns in the base currency of the Fund.
- Counterparty Risk: any derivative contract, including FX hedging, may be at risk if the counterparty fails.
- ESG Risk: there may be limitations to the availability, completeness or accuracy of ESG information from third-party providers, or inconsistencies in the consideration of ESG factors across different third party data providers, given the evolving nature of ESG.
- For full details of the Fund's risks, please see the prospectus which may be obtained from Liontrust (address overleaf) or online at www.liontrust.co.uk.

Charges for this fund

- The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None

- This is the maximum that might be taken out of your money before it is invested.

Charges taken from the Fund over the year	
Ongoing charges	Classes Z GBP Acc, Z GBP Inc: 1.10%
	Class A GBP Acc: 1.95%

Charges taken from the Fund under certain specific circumstances	
Performance fee	None

- The entry and exit charges shown are maximum figures. In some cases you might pay less – you can find this out from your financial adviser or fund platform if you are not using a financial adviser.
- The ongoing charges figure is based on expenses as at 31 December 2023. This figure may vary from year to year. It excludes:
 - portfolio transaction costs, except in the case of an entry/exit charge paid by the UCITS when buying or selling units/shares in another collective investment undertaking.
- For more information about charges and what is included in each charge, please see the Fund's prospectus, which is available electronically at www.liontrust.co.uk or visit the costs and charges page on our website at www.liontrust.co.uk/cost-and-charges.

Past performance

- Past performance does not predict future returns. It has been calculated on the basis that any distributable income of the Fund has been reinvested. The past performance shown in the chart takes into account all charges except entry and exit charges.
- The Fund launch date is 03 March 2014.
- The A GBP Acc share class launch date is 03 March 2014.
- The base currency of the Fund is pounds sterling.
