Type

The Class is a share class of the Fund which is a sub-fund of the Company, an open ended umbrella type investment company with variable capital incorporated with limited liability under the laws of Ireland, registered number 459084, authorised in Ireland as an investment company pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 as amended.

Term

This investment has no fixed maturity date.

Objectives

The investment objective of the Fund is to maximise total returns (a combination of income and capital growth) over five years or more through investment in sustainable securities, primarily consisting of European investment grade fixed income securities. The Investment Adviser will seek to achieve this predominately through investing in Euro denominated investment grade corporate bonds.

The Fund is considered to be actively managed in reference to the iBoxx Euro Corporates All Maturities Index (the "Benchmark") by virtue of the fact that it uses the Benchmark for performance comparison purposes. The Benchmark is not used to define the portfolio composition of the Fund and the Fund may be wholly invested in securities which are not constituents of the Benchmark. For the avoidance of doubt, the Benchmark is not used to measure the sustainable impact of the Fund.

The Fund will invest in debt securities of differing creditworthiness either directly or through derivative positions. It is possible that at certain times, a substantial portion, or the entire Fund could be invested in government bonds, cash or cash equivalents. The Fund will primarily focus on investment grade instruments and maintain an average weighted credit rating of at least 'BBB'. The Fund is not permitted to invest in bonds rated below 'B'. Where instruments are unrated, the Investment Adviser will calculate an internal rating.

Investment may be made in developed markets or up to 5% of its net assets in what the Investment Adviser considers to be emerging markets. For the purposes of the Fund, emerging market countries can be defined as all the countries in the world other than those classified as "advanced" by the International Monetary Fund ("IMF"). Although the Fund's investment in emerging markets may be on a worldwide basis, any allocation to emerging markets is expected to be concentrated in the developing countries of Europe. Given the limited permitted exposure to emerging market debt, there are no formal limits on the investment in any one country, with the exception that the Fund is not permitted to invest in Russia. With the exception of permitted investments in unlisted securities, investment by the Fund in securities or in units of open ended collective schemes (subject to a maximum of 10% in collectives), investment is restricted to securities listed or dealt in on the Recognised Exchanges.

Intended retail investor

The Fund is considered to be suitable for investors seeking long-term capital growth over a medium to long term investment horizon (at least 5 years) and who understand and are prepared to accept the risks and a medium to medium/high level of volatility, particularly given the Fund's equity investment.

What are the risks and what could I get in return?

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level and poor market conditions are very unlikely to impact our capacity to pay you.

The risk indicator assumes you keep the product for a minimum of 5 years.

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Please note that even the lowest risk class can lose you money and that extreme adverse market circumstances can mean you suffer severe losses in all cases. The summary risk indicator only reflects the market risk and credit risk of the product. Other risks materially relevant to the product which are not taken into account in the summary risk indicator are: leverage, derivatives, liquidity, index, market cap, hedging, counterparty, currency, portfolio concentration and emerging markets risk, where applicable.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

For full details of the Company's risks, please see the prospectus which may be obtained from Liontrust (address overleaf) or online at www.liontrust.eu.
