Term

This investment has no fixed maturity date.

Objectives

The investment objective of the Fund is to achieve long term capital growth by investing primarily in European smaller companies. The Investment Adviser will seek to achieve this either by direct investment in equities or through the use of financial derivatives instruments for efficient portfolio management, investment purposes, hedging purposes, or to adjust the Fund's currency exposures.

The Fund is considered to be actively managed in reference to MSCI Europe Small -Cap Index net total return (the "Benchmark") by virtue of the fact that it seeks to outperform the Benchmark. However the Benchmark is not used to define the portfolio composition of the Fund and the Fund may be wholly invested in securities which are not constituents of the Benchmark.

The Fund continuously invests at least 51% of its Net Asset Value in equity securities which are listed on a stock exchange or traded on an organized market. The fund will invest in equity related derivatives such as CFDs, total return swaps, futures and embedded derivatives. The Fund may also invest in debt securities including government and corporate bonds, Money Market Instruments including treasury bills, certificates of deposit, bankers acceptances and commercial paper, warrants, cash and near cash and deposits. Any such investment in debt securities is for liquidity and cash management purposes. Any investment in bonds will be in corporate and government fixed or floating rate instruments which may be rated or unrated (up to 15% of the net assets of the Fund may be invested in below investment grade and/or unrated bonds). At times the Investment Adviser may decide to hold a more concentrated portfolio, and it is possible that a substantial portion of the Fund could be invested in cash or cash equivalents. In addition the Fund may invest in exchange traded funds and other open-ended collective investment schemes. Although the Fund may invest in all economic sectors in all parts of the world, it is intended that the fund will invest primarily in companies incorporated in any European Economic Area ("EEA") Member State, together with the UK and Switzerland, or which are listed on a recognised stock exchange of an EEA Member State, the UK or Switzerland.

Intended retail investor

The Fund is considered to be suitable for investors seeking long-term capital growth over a medium to long term investment horizon (at least 5 years) and who understand and are prepared to accept the risks and a medium to medium/high level of volatility, particularly given the Fund's equity investment.

What are the risks and what could I get in return?

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level and poor market conditions will likely impact our capacity to pay you.

The risk indicator assumes you keep the product for a minimum of 5 years.

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Please note that even the lowest risk class can lose you money and that extreme adverse market circumstances can mean you suffer severe losses in all cases. The summary risk indicator only reflects the market risk and credit risk of the product. Other risks materially relevant to the product which are not taken into account in the summary risk indicator are: leverage, derivatives, liquidity, index, market cap, hedging, counterparty, currency, portfolio concentration and emerging markets risk, where applicable.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

For full details of the Company's risks, please see the prospectus which may be obtained from Liontrust (address overleaf) or online at www.liontrust.eu.
