- 5.0% ■ Leading ESG management
- 1.1% ■ Better monitoring of supply chains and quality control
- 11.3% ■ Portfolio construction diversification

Issued by Liontrust Fund Partners LLP (2 Savoy Court, London WC2R 0EZ), authorised and regulated in the UK by the Financial Conduct Authority (FRN 518165) to undertake regulated investment business. Investment in the Fund involves foreign currencies and may be subject to fluctuations in value due to movements in exchange rates. The value of fixed income securities will fall if the issuer is unable to repay its debt or has its credit rating reduced. Generally, the higher the perceived credit risk of the issuer, the higher the rate of interest. The Distribution Yield is higher than the Underlying Yield because the fund distributes coupon income and the fund's expenses are charged to capital. This has the effect of increasing dividends while constraining the fund's capital appreciation. The Fund may invest in derivatives. The use of derivatives may create leverage or gearing. A relatively small movement in the value of a derivative's underlying investment may have a larger impact, positive or negative, on the value of a fund than if the underlying investment was held instead.
